V8 WebdriverIO - Changes

Who is this for?

1. If you are installing webdriverIO after `2022-12-01` OR
2. If you wanted to upgrade to version 8

Changes Required:

When following the videos, please note that the following changes are required if you are installing version 8. Just letting you know, there are around 2000+ students who may be using the older version 7 who got enrolled before 2022-12-01, so I wanted the course to be backward-compatible.

Thanks for your understanding !

#	wdio-v7	wdio-v8
1	**browser.config** Examples: `browser.config.testid`	**browser.options** Example: `browser.options.testid`

2	When importing **.ts** file use the file extension to **.js**
	
	Example:
	`import sauseHomePage from`
	`"../../page-objects/sause.home.page"`
		
		Example:
		`import sauseHomePage from`
		`"../../page-objects/sause.home.page.js":`

3	When importing json file, use **assert { type: "json" };** at the end
	
	Example:
	`import constants from`
	`"../../../data/constants.json"`
		
		Example:
		`import constants from`
		`"../../../data/constants.json" assert {`
		`type: "json" };`
